Full Stack Engineer with 4.5+ years of experience building scalable enterprise applications across frontend and backend ecosystems. Expertise in Angular, React, TypeScript, and modern web architectures, with hands-on experience developing REST APIs, integrating backend services, and implementing end-to-end solutions. Skilled in component-driven development, CI/CD automation, Azure DevOps workflows, and performance optimization. Proven track record of delivering maintainable, high-quality applications that translate complex business requirements into scalable production systems.

PROFESSIONAL EXPERIENCE

Accenture Solutions Pvt. Ltd., Gurugram

Jun 2021 – Present

Application Development Analyst | Full Stack Developer

CIO – Enterprise Multi-Application Platform (IDP & ARC COE)

IDP – Multi-Module Enterprise Platform (Angular v18–v21)

- Contributed to the architecture and development of a scalable enterprise platform supporting PLC, CDL, and Account Console modules used across multiple business functions.
- Built and maintained reusable UI components through a centralized Master Component Library, improving consistency and reducing development effort across teams.
- Designed and integrated AI-powered chatbot workflows to streamline account management and user interactions.
- Developed data-intensive dashboard modules with optimized rendering, efficient state management, and enhanced user experience.
- Led a Storybook proof of concept (POC) to establish component documentation standards and improve UI reusability.
- Implemented MCP-driven Figma-to-code workflows, reducing design inconsistencies and accelerating frontend delivery.
- Collaborated closely with backend teams to integrate REST APIs and deliver seamless end-to-end functionality.

ARC COE – Executive Client Microsites

- Developed responsive executive microsites using HTML, SCSS, and JavaScript for leadership-driven client engagement initiatives.
- Delivered high-quality digital experiences under aggressive timelines while maintaining performance, accessibility, and responsiveness standards.
- Worked directly with stakeholders to translate business requirements into production-ready solutions.

Accor – Global Hospitality Platforms (React + AEM)

- Developed reusable React components integrated with Adobe Experience Manager (AEM), enabling scalable content management across multiple hospitality brands.
- Delivered frontend solutions for six global hospitality brands while ensuring design consistency and optimal user experience.
- Improved website performance through component optimization, responsive design implementation, and cross-browser compatibility enhancements.
- Collaborated with distributed teams to deliver high-quality releases across international markets.

Command Control Solution & ReconSmart (Product Development)

- Delivered feature enhancements aligned with product roadmaps and evolving customer requirements.
- Designed modular and scalable UI architectures supporting both customization and long-term maintainability.
- Collaborated with Product Owners, QA, and engineering teams throughout the software development lifecycle.
- Contributed to production releases, defect resolution, and continuous performance optimization initiatives.

TECHNICAL SKILLS

Frontend: Angular (v18–v21), React, TypeScript, JavaScript (ES6+), HTML5, SCSS

Architecture & State Management: RxJS, NgRx, Component-Driven Design

Tools: Git, VS Code, Storybook

Backend: Node.js, Express.js, REST API Development, Authentication & Authorization (JWT, OAuth), API Integration

DevOps & Quality: Azure DevOps, CI/CD, SonarQube

Database: MongoDB, SQL

EDUCATION

Bachelor of Technology (ECE) - GLA University, Mathura | CGPA: 7.02/10 | *May 2021*

Interests: Pickleball, Badminton, Cricket, Chess, and traveling to explore local cultures
